The Inheritance of Rome Jun 21 2022 The idea that with the decline of the Roman Empire Europe entered into some immense •dark age• has long been viewed as inadequate by many historians. How could a world still so profoundly shaped by Rome and which encompassed such remarkable societies as the Byzantine, Carolingian and Ottonian empires, be anything other than central to the development of European history? How could a world of so many peoples, whether expanding, moving or stable, of Goths, Franks, Vandals, Byzantines, Arabs, Anglo-Saxons, Vikings, whose genetic and linguistic inheritors we all are, not lie at the heart of how we understand ourselves? The Inheritance of Rome is a work of remarkable scope and ambition. Drawing on a wealth of new material, it is a book which will transform its many readers• ideas about the crucible in which Europe would in the end be created. From the collapse of the Roman imperial system to the establishment of the new European dynastic states, perhaps this book•s most striking achievement is to make sense of an immensely long period of time, experienced by many generations of Europeans, and which, while it certainly included catastrophic invasions and turbulence, also contained long periods of continuity and achievement. From Ireland to Constantinople, from the Baltic to the Mediterranean, this is a genuinely Europe-wide history of a new kind, with something surprising or arresting on every page.

**Trade Unions in Western Europe since 1945** Mar 06 2021 The Societies of Europe is an 8-title series of historical data handbooks and accompanying CD-ROM sets, on the development of Europe from the nineteenth to the twentieth century. The series is a product of the Mannheim Centre for Social research, a body dedicated to comparative research on Europe and one of the leading social research institutes in the world. It is a collection of datasets giving a clear and systematic study of long term developments in European society. The data is presented statistically and is clearly comparative. The Societies of Europe is the most comprehensive data series available on Western European social issues. Each book is accompanied by a CD-ROM containing data sets not included in the text enabling users to manipulate the data as wanted. Information is available in different programmes (Excel, SPSS and SAS) and in data structures for analysis, viewing and building time series. This comparative data handbook offers an empirical base to a long-term and comparative understanding of changes and variations in European union movements. It provides information on the context and history of union development, the changes in the structure of post-war unionism until today, the long-term trends in union membership and union density, and the shifts in the cross-sectional composition of union membership. This book and CD-ROM are the result of many years of research by the authors in collaboration with an international research team, and provides an original source for comparative and national studies or individual enquiries. The country and comparative tables offer cross-checked and often

newly-calculated statistics on national union organizations and their membership series. The CD-ROM includes selected tables from the handbook and provides additional databases with organizational data and membership series of major national and European union organizations.

**A History of Modern Europe** Dec 27 2022 Available in both one-volume and two-volume paperback editions, A History of Modern Europe presents a panoramic survey of modern Europe from the Renaissance to the present day. A single author lends a unified approach and consistent style throughout, with an emphasis on the connections of events and people over time. The Third Edition, like the two before it, is authoritative and up-to-date. New to the Third Edition is the theme of empire. From the imperial rivalries between France and Spain in the sixteenth and seventeenth centuries, through the rise and fall of the Ottoman Turkish empire, and on into the imperial history of the twentieth century—decolonization, the spread of the Soviet empire, and the imperial power of the United States—the theme of empire helps students find commonalities among the events of European history.

*The Rise of the 'New Right' in Europe from the 2000s onwards: The Case of the Dutch "Party for Freedom"* Apr 07 2021 Essay from the year 2011 in the subject Politics - International Politics - Topic: European Union, grade: A, Saint Mary's University, course: Politics of the EU, language: English, abstract: From the beginning of the current century, many European countries have witnessed the resurgence of extreme right political ideologies in their social and political arenas. Political entities such as the Freedom Party of Austria, Swiss People's Party, the Dutch Party for Freedom, the Hungarian Jobbik Party, the Swedish Democrats and the German National Democrat Party all share two or more of the following ideologies and characteristics: Euroscepticism, cultural conservatism, anti-globalism, national liberalism, anti-immigration, anti-Islamism, anti-Semitism and right-wing populism. Most of these parties gather under the umbrellas of several right wing formations, particularly as Non-Inscrits, in the European Parliament opposing the process of European integration. Their political success in the period after 2000, underlines the current trend towards right wing politics in Europe.

**The Substance Behind the Rhetoric of a 'Europe of the Regions' and the Main Impediments to the Establishment of an EU-wide System of Regional Governance?** Oct 21 2019 Essay from the year 2006 in the subject Politics - International Politics - Topic: European Union, grade: 74, Swansea University, course: After Democracy: The EU and the Governance of Europe, 9 entries in the bibliography, language: English, abstract: The term 'Europe of the Regions' has been used over the last decades either to describe one of the supposed effects of the integration process on European governance or as a normative goal in the sense of a post-national Europe. Proponents of a Europe of the Regions assume that the combined effect of European integration at the top and regional decentralisation at the bottom will eventually lead to a dissolving of the traditional nation state in Europe. Others reject this view and see this development rather as the emergence of a new form of multilevel governance within the existing framework of national and European institutions. The regional element of the EU can be retraced to the establishment of the European Regional Development Fund (ERDF) in 1975 but, as Harvie points out, since that time regional development has taken a dynamic of its own which challenges the traditional nation state: 'Regionalisation, the chopping-up of problems into manageable areas, has given way to a subjective and aggressive regionalism.' Regions have doubtlessly established themselves as key players in European governance. The purpose of this essay is to clarify whether a Europe of the regions is a viable option in practice and whether it is desirable at all. To answer this question, this essay will first of all clarify the ambiguous term 'region' and analyse different concepts of regional governance in

several EU countries. In a next step, it will examine the various ways of access and influence that regions can have on the EU policy process and assess the viability of these approaches. Furthermore, the role of regionalist and minority nationalist parties in promoting (or impeding) a regionalised Europe will be highlighted. Finally, the

**Europadämmerung** Jul 22 2022 Nach 1989 waren Landkarten plötzlich nicht länger in Mode. Die Grenzen sollten geöffnet werden für Menschen, Güter, Kapital und Ideen. An die Stelle der alten Karten traten Graphiken, welche die ökonomische Verflechtung innerhalb der EU illustrierten. Heute erleben wir einen ideologischen Gezeitenwechsel: Wo die Mehrheit der Europäer noch vor einigen Jahren optimistisch auf die Globalisierung blickte, empfinden sie Migration und die Rückkehr der Geopolitik als Quelle der Unsicherheit. Ivan Krastev untersucht die Ursachen für diesen Wandel und erörtert, welche Formen die europäische Desintegration annehmen könnte. Ein Zerfall der EU, so Krastev, wäre eine Tragödie, die den Kontinent zu internationaler Bedeutungslosigkeit verurteilen würde.

**Backwardness and Modernization** Aug 19 2019 The subject of this book is the economic backwardness of Poland and Eastern Europe in the modern era. The studies in the first part analyse various aspects of the region's economic and social history in the period from the 16th to the 20th centuries; those in the second part deal with the change following the fall of state socialism. Professor Kochanowicz here argues that, for understanding the present, it is necessary to take into consideration historical legacies.

**The Cambridge Economic History of Europe from the Decline of the Roman Empire: Volume 8, The Industrial Economies: The Development of Economic and Social Policies** Jun 28 2020 The eighth and final volume of The Cambridge Economic History of Europe is the third of a group of three that cover the economic history of the western world during and since the Industrial Revolution. The main theme of this volume is the role played in the growth of industrial economies by the development of economic and social policies. The volume also discusses these factors in detail for the principal economies, and includes detailed studies of France, Britain, Germany, the United States, Austria-Hungary, the countries of Eastern Europe, Russia, Sweden, and Japan.

**The United States and Europe in the Twentieth Century** Feb 23 2020 The relationship between the US and Europe in the 20th century is one of the key considerations in any understanding of international relations/international history during this period. David Ryan first sets the context by looking at the trends and traditions of America's foreign relations in the 19th century, and then considers the changing nature of America's vision of Europe from 1900 to the present. The book examines America's response to and involvement in the two World Wars, including the structure of international power after the First World War and American reaction to the rise of Nazi Germany. American/European relations during the Cold War (1945-1970) are discussed, and Ryan considers the contentious debate that America was trying to establish an empire by invitation. Finally, the book looks at the ever-increasing unification of Europe and how this has affected America's role and influence.

**A New Europe for the Old?** Aug 31 2020 Since 1989, it has been possible to review what has been published both at home and abroad on the communist states of Central and Eastern Europe and, no less importantly, on the Soviet Union itself, from a new perspective. Few have chosen to engage in this Herculean task, whether out of a residual civility in not wishing to mock certain aging scholars whose research would appear curiously dated, or out of a sense of fatigue with the whole subject of casting aspersions on mistaken views. "A New Europe for the Old?" asks whether the master narratives that circulated so widely in the West in the half-century since 1945 remain valid. Stephen Graubard's volume raises

pertinent questions regarding the current state of the European world as it has evolved since 1989. He includes contributions from important scholars around the world: "A New Europe for the Old?" by Martin Malia; "The Serbs: The Sweet and Rotten Smell of History" by Tim Judah; "Illyrianism and the Croatian Quest for Statehood" by Marcus Tanner; "To Be or Not To Be Balkan: Romania's "Quest for Self-Definition" by Tom Gallagher; "Ukraine: From an Imperial Periphery to Sovereign State" by Roman Szporlunk; "Ethnic Nationalism in the Russian Federation" by Anatoly M. Khazanov; "Im Osten viel Neues: Plenty of News from the Eastern Lander" by Barbara Ischinger; "Discourse and (Dis)Integration in Europe: The Cases of France, Germany and Great Britain" by Vivien A. Schmidt; "The European Debate on Citizenship" by Dominique Schnapper; "Has the Nation Died? The Debate Over Italy's Identity (and Future)" by Darion Biocca; and "Postwar Europe" by Arne Roth. "A New Europe for the Old?" provides greater sympathy for the complexity of societies, and argues for greater balance of those that are small, and that do not cast a long shadow in the world today. In the 21st as in the 20th century, they may be engines of change, both as a result of the disorder that they produce as well as the ways in which their values, however seemingly antiquated, survive and prosper, and not only in their native lands. This volume should intrigue historians and European studies scholars alike.

Europe and the British Geographical Imagination, 1760-1830 Jan 16 2022 Europe and the British Geographical Imagination, 1760-1830 explores what literate British people understood by the word 'Europe' in the late eighteenth and early nineteenth centuries. Was Europe unified by shared religious heritage? Where were the edges of Europe? Was Europe primarily a commercial network or were there common political practices too? Was Britain itself a European country? While intellectual history is concerned predominantly with prominent thinkers, Paul Stock traces the history of ideas in non-elite contexts, offering a detailed analysis of nearly 350 geographical reference works, textbooks, dictionaries, and encyclopaedias, which were widely read by literate Britons of all classes, and can reveal the formative ideas about Europe circulating in Britain: ideas about religion; the natural environment; race and other theories of human difference; the state; borders; the identification of the 'centre' and 'edges' of Europe; commerce and empire; and ideas about the past, progress, and historical change. By showing how these and other questions were discussed in eighteenth- and nineteenth-century British culture, *Europe and the British Geographical Imagination, 1760-1830* provides a thorough and much-needed historical analysis of Britain's enduringly complex intellectual relationship with Europe.

*A History of Law in Europe* Nov 26 2022 The first English translation of a comprehensive legal history of Europe from the early middle ages to the twentieth century, encompassing both the common aspects and the original developments of different countries. As well as legal scholars and professionals, it will appeal to those interested in the general history of European civilisation.

The Boundaries of Europe May 20 2022 Europe's boundaries have mainly been shaped by cultural, religious, and political conceptions rather than by geography. This volume of bilingual essays from renowned European scholars outlines the transformation of Europe's boundaries from the fall of the ancient world to the age of decolonization, or the end of the explicit endeavor to "Europeanize" the world. From the decline of the Roman Empire to the polycentrism of today's world, the essays span such aspects as the confrontation of Christian Europe with Islam and the changing role of the Mediterranean from "mare nostrum" to a frontier between nations. Scandinavia, eastern Europe and the Atlantic are also analyzed as boundaries in the context of exploration, migratory movements, cultural exchanges, and war. *The Boundaries of Europe*, edited by Pietro Rossi, is the first installment in the ALLEA book series *Discourses on Intellectual Europe*, which seeks to explore the question of an

intrinsic or quintessential European identity in light of the rising skepticism towards Europe as an integrated cultural and intellectual region.

**Europa und die Türkei im 18. Jahrhundert / Europe and Turkey in the 18th Century** Oct 01 2020 Thema dieses Bandes sind die interkulturellen Kontakte und die wechselseitige Wahrnehmung zwischen der Türkei und Europa im 18. Jahrhundert. Die »Türkengefahr«, eines der wichtigsten Antagonismuskonzepte der frühen Neuzeit, verblasste nach der osmanischen Niederlage bei der zweiten Belagerung Wiens 1683, und das Bild des Türken wandelte sich vom bedrohlichen, unbesiegbaren Schrecken der Christenheit zum kuriosen, exotischen Nachbarn. Die osmanische Kultur fand in den politischen, wissenschaftlichen, wirtschaftlichen und ästhetischen Diskursen des 18. Jahrhunderts breite, zum Teil euphorische Aufnahme und Verarbeitung. Zugleich verstärkte sich zu Beginn des 18. Jahrhunderts der europäische Einfluss im gesellschaftspolitischen und kulturellen Leben des Osmanischen Reichs. Welche Möglichkeiten bestanden, sich ein Bild des Anderen zu machen, und zu welchen Teilen gründete es auf autistischer Selbstbespiegelung einerseits, auf Neugier und produktiver Aneignung andererseits? Welche Formen des interkulturellen Kontaktes existierten und wie sind sie dokumentiert? Auf diese Fragen antworten die Beiträge aus der Sicht verschiedener akademischer Disziplinen.

**Women in Europe Between the Wars** Nov 02 2020 The central aim of this interdisciplinary book is to make visible the intentionality behind the 'forgetting' of European women's contributions during the period between the two world wars in the context of politics, culture and society. It also seeks to record and analyse women's agency in the construction and reconstruction of Europe and its nation states after the First World War, and thus to articulate ways in which the writing of women's history necessarily entails the rewriting of everyone's history. By showing that the erasure of women's texts from literary and cultural history was not accidental but was ideologically motivated, the essays explicitly and implicitly contribute to debates surrounding canon formation. Other important topics are women's political activism during the period, antifascism, the contributions made by female journalists, the politics of literary production, genre, women's relationship with and contributions to the avant-garde, women's professional lives, and women's involvement in voluntary associations. In bringing together the work of scholars whose fields of expertise are diverse but whose interests converge on the inter-war period, the volume invites readers to make connections and comparisons across the whole spectrum of women's political, social, and cultural activities throughout Europe.

A Short History of Europe Oct 25 2022 What is Europe? Firstly, of course, it is a continent made up of countless disparate peoples, races and nations, and governed by different ideas, philosophies, religions and attitudes. Nonetheless, it has a common thread of history running through it, stitching the lands and peoples of its past and present together into one fabric and held together by the continent's great institutions, such as the Church of Rome, the Holy Roman Empire, the European Union, individual monarchies, trade organisations and social movements. Europe,

however, is also an idea. From almost the beginning of time, men have harboured aspirations to make this vast territory one. The Romans came close and a few centuries later, the foundations for a great European state were laid with the creation of the Holy Roman Empire - an empire different to any other in that it enjoyed the approval of God, through the Church in Rome. Napoleon overreached himself in attempting to create a European-wide Empire - as did Adolf Hitler. Now, however, Europe is as close as it ever has been to being one entity, yet we Europeans still cling to our national independence. In *A Short History of Europe* Gordon Kerr provides a coherent map of the jumbled history of Europe and the European idea that has brought us to this point.

Moving Europeans Jan 24 2020 "The migrations, voluntary and forced, that overran the New World following the Age of Discovery and reached their high-water mark in the years before World War I make up only part of the story of European migrations. During the same period, millions of people in Western Europe were on the move as well. *Moving Europeans* tells the story of these vast population movements as it examines the links between human mobility and the fundamental changes that transformed European life." "Leslie Page Moch describes the changing face of Western European migration from the preindustrial era to the modern day. She focuses on the changing patterns of work, landholding, and population in rural and urban areas, placing them in the context of the social and political forces that helped to shape human migration. She looks at a broad range of issues, from gender and family practices to the regulations of nineteenth-century nation-states, and details the different experiences of men and women, of the propertied and the proletariat, as she fills in important gaps in our understanding of human mobility."--

*The Logic of Regional Integration* Dec 03 2020 In the late 1980s regional integration emerged as one of the most important developments in

world politics. It is not a new phenomenon, however, and this 1999 book presents an analysis of integration across time, and across regions. Walter Mattli examines projects in nineteenth- and twentieth-century Europe, but also in Latin America, North America and Asia since the 1950s. Using the tools of political economy, he considers why some integration schemes have succeeded while many others have failed; what forces drive the process of integration; and under what circumstances outside countries seek to join. Unlike traditional political science approaches, the book stresses the importance of market forces in determining the outcome of integration; but unlike purely economic analyses, it also highlights the impact of institutional factors. The book will provide students of political science, economics, and European studies with a framework for the study of international cooperation.
