*Managing Modernity in the Western Pacific Jun 11 2021 Fast money
schemes in Papua New Guinea, collectivities in rural Solomon Islands,*

gambling in the Cook Islands, and the Vanuatu tax haven—all feature in the interface between Pacific and global economies. Since the 1970s, Melanesian countries and their peoples have been beguiled by the prospect of economic development that would enable them to participate in a world market economic system. Access to global markets would provide the means to improve their standard of living, allowing them to take their places as independent nations in a modern world. Managing Modernity in the Western Pacific takes a broad sweep through contemporary topics in Melanesian anthropology and ethnography. With nuanced and rigorous scholarship, it views contemporary debate on modernity in Melanesia within the context of the global economy and cultural capitalism. In particular, contributors assess local ideas about wealth, success, speculation, and development and their connections to participation in institutions and activities generated by them. This innovative and accessible collection offers a new intersection between Western Pacific anthropology and global studies.

Critical Approaches to Online Learning Feb 25 2020 Online learning has become an increasing presence in higher education course design, with most courses combining physical real time engagement with asynchronous learning activity. Now, however, there is a greater need for this one-stop guide to critical practice in this area, as we rethink the role of digital in the social practices of university learning and teaching. This book provides a critical and contemporary 'deep dive' into the socio-material, technological and pedagogical practices at work in virtual and digital higher education. Examples are drawn from across and between disciplinary pedagogies with a focus on blended and hybrid approaches and the pivot to fully online made urgent by Covid-19 but drawing on existing best practice. The Critical Practice in Higher Education series provides a scholarly and practical entry point for academics into key areas of higher education practice. Each book in the series explores an

individual topic in depth, providing an overview in relation to current thinking and practice, informed by recent research. The series will be of interest to those engaged in the study of higher education, those involved in leading learning and teaching or working in academic development, and individuals seeking to explore particular topics of professional interest. Through critical engagement, this series aims to promote an expanded notion of being an academic – connecting research, teaching, scholarship, community engagement and leadership – while developing confidence and authority.

Love and Death in Kubrick Jul 12 2021 The films of Stanley Kubrick have left an indelible mark on the history of American cinema. This text explores the auteur's legacy, specifically positioning his body of work within the context of cultural theory. A single chapter is devoted to each of Kubrick's seven films: Lolita, Dr. Strangelove, 2001: A Space Odyssey, A Clockwork Orange, The Shining, Full Metal Jacket, and Eyes Wide Shut. Particular attention is paid to the role of love and death in Kubrick's films, emphasizing his innovative exploration of love and sex, and the portrayal of mortality via masculine violence.

Quicklet on Christopher McDougall's Born to Run Nov 04 2020

*Quicklets: Learn More. Read Less. Born in 1962, Christopher McDougall is an American author and journalist with a penchant for covering the odd or extreme in the world: Frenchmen who work out in coconut trees, fugitive Mexican pop stars, and endurance running. After graduating from Harvard, McDougall was hired by the Associated Press as their new Lisbon correspondent, despite lacking knowledge of both Portuguese and journalism. After leaving the AP, McDougall wrote for a wide variety of publications, including Men's Health and New York Times Magazine. In their pages, he covered a wide breadth of subjects, from why America hasn't been hit by another terrorist attack since September 11 to "physiological oddities" like the health benefits of old lumberjack saws or the Tarahumara tribe of near superhuman ultrarunners. First published in 2009, *Born to Run: A Hidden Tribe, Superathletes, and the Greatest Race the World Has Never Seen* became a New York Times bestseller, staying on the list for over four months and selling over 219,000 hardcover copies in its first year. A movie version of the book is reportedly in the works, to be written and directed by Peter Sarsgaard.*

Possessing Your Inheritance May 10 2021 Inheritance means taking hold of the portion God has planned for you. Jesus said, I have come that they may have life, and that they may have it more abundantly (John 10:10), demonstrating God's longing for His people to prosper, to accomplish all He has planned for them. He wants to take them from a place of judgment, desolation and fruitlessness to a place of restoration, hope and abundant life. In this revised and updated edition of *Possessing Your Inheritance*, prophetic intercessor Chuck Pierce, with co-author Rebecca Wagner Sytsema, shows readers how to embrace what God has destined for them, and for their children and their children's children.

The McDougall Program Jun 30 2020 In this ground-breaking book, Dr. John McDougall, bestselling author and creator of the nationally renowned diet and exercise program at the St. Helena Hospital in Deer Park, California, introduces his remarkable twelve-day plan. Building on the idea that the traditional meat-rich American diet is hazardous to our health, Dr. McDougall has developed a medically sound, low-fat, starch-based diet that not only facilitates weight loss but also reverses serious illness, without drugs, and provides a broad range of dramatic and lasting health benefits. Step-by-step, he takes you through his revolutionary new program, providing: Over 130 easy-to-prepare recipes Delicious day-by-day menus Suggestions for healthful dining out Plus a comprehensive listing of health problems from arthritis to ulcer disease, comparing the traditional, often drastic medical approach and

The McDougall Program's nutritionally based alternative. As featured in the book and movie Forks and Knives, John A McDougall delivers a powerful and effective food regiment.

My Piece of Hollywood May 30 2020 Charley Pickney wanted to become a screenwriter, but right out of college computer science provided a more reliable income where he could eat regularly and work standard business hours. So he chose the easier road to success. Then one day he got a chance to "shoot the moon" and screenwrite a cowboy-western saga for a Dallas cowboy boot manufacturer, and he hitched his wagon to that star. He was glad that he did.

Middle and High School Teaching Feb 07 2021 Middle and High School Teaching: Methods, Standards, and Best Practices is an interactive textbook that is fully integrated with PowerPoint slides, a web site, assessments to meet NCATE and INSTASC standards, and basal secondary level textbook chapters for each of the content areas. The text includes a chapter on standards, history, current issues and strategies for each of the major content areas: English, Mathematics, Science, Social Studies, World Languages, Fine and Performing Arts, and Physical and Health education. Providing unique coverage for differentiated instruction at the college level, the text integrates standards and methods for general and specific subject matter by drawing on professional education association web sites, covering traditional methods topics, and providing authentic assignments. The text is ideal for courses in secondary general methods, curriculum and instruction, introduction to teaching, or for the first course of a two-part sequence in specific methods. Web-based resources, including PDF copies of middle and high school basal textbook content, lesson-planning templates, ERIC documents for current issues, and PowerPoint slides for each chapter, enable professors to easily choreograph their

instruction for classes of mixed majors or single major, and courses of varying size that may be taught completely or partly online. The book and its ancillary materials scaffold the learning experience by presenting topics in a logical sequence, beginning with an introduction to the challenges of the profession, followed by differences between middle schools and high schools, basic skills across the curriculum, approaches to teaching diverse learners, planning, methods, and assessment, and concluding with trends, standards, and differences between the disciplines. Instructors can choose from and modify more than 100 authentic assignments, which are tied to NCATE and INTASC standards, ranging from interviewing middle school students to creating lesson plans. In addition, special emphasis is placed on such topics as motivation theory and techniques for diverse learners and integrating basic skills and literacy into subject field planning and instruction. Straightforward, easily readable, and concise. The text is organized into compact topics (rather than dense chapters) and includes a Best Practices feature, which engages students in reading their textbook Authentic content chapters from middle and high school textbooks. Available at the web site, downloadable PDF copies of basal textbook chapters (from McDougal Littell) across the subject areas enable students to apply methods learned from the textbook's lesson-planning activities and assignments. More than 100 potential assignments. Instructors can select and modify presented assignments to best suit their students' and course needs. Each assignment is tied to an INTASC/NCATE standard for ease of documentation or portfolio development. Coverage and integration of key national standards. The book integrates The Interstate New Teacher Assessment and Support Consortium (INTASC) standards, The National Council for Accreditation of Teacher Education (NCATE) standards, The Goals 2000 legislation, The No Child Left Behind legislation, and the content

standards defined by the professional organizations into a coherent structure for preservice teachers. Practical pedagogy. Supportive features include Teacher's Tips boxes with practical ideas and strategies for the classroom, Question boxes to encourage critical thinking, For the Reflective Practitioner quotes and insights, authentic Assignments, lists of Best Practices, and web resources.

Treaty Interpretation Apr 09 2021 The rules of treaty interpretation codified in the 'Vienna Convention on the Law of Treaties' now apply to virtually all treaties, in an international context as well as within national legal systems, where treaties have an impact on a large and growing range of matters. The rules of treaty interpretation differ somewhat from typical rules for interpreting legal instruments and legislation within national legal systems. Lawyers, administrators, diplomats, and officials at international organisations are increasingly likely to encounter issues of treaty interpretation which require not only knowledge of the relevant rules of interpretation, but also how these rules have been, and are to be, applied in practice. Since the codified rules of treaty interpretation came into decree, there is a considerable body of case-law on their application. This case-law, combined with the history and analysis of the rules of treaty interpretation, provides a basis for understanding this most important task in the application of treaties internationally and within national systems of law. Any lawyer who ever has to consider international matters, and increasingly any lawyer whose work involves domestic legislation with any international connection, is at risk nowadays of encountering a treaty provision which requires interpretation, whether the treaty provision is explicitly in issue or is the source of the relevant domestic legislation. This fully updated new edition features case law from a broader range of jurisdictions, and an account of the work of the International Law Commission in its

relation to interpretative declarations. This book provides a guide to interpreting treaties properly in accordance with the modern rules.

The Gold Coast Transformed Dec 05 2020 The Gold Coast is one of Australia's premier tourism destinations, a city cut out of coastal vegetation, including paperbark swamps, mangroves and rainforests of worldwide significance. The Gold Coast Transformed is a collection of integrated chapters identifying and assessing the environmental impacts of the building of Australia's sixth largest city. From the time of the first timber-getters through to the present, the book traces the cumulative impacts of humans on the now World Heritage-listed rainforest and surrounding ecosystems. The city's natural and engineered environments are both fascinating and vulnerable. The construction of massive high-rise apartment blocks, on what were frontal beach dunes, is one of the fundamental mistakes not to be repeated. The book illustrates how and why major environmentally destructive development took place and discusses the impacts of such development on the Gold Coast's beaches, wildlife, and terrestrial and marine environments, such as the destruction of riparian mangrove forest. The Gold Coast Transformed also shows the possibility of sustaining natural populations and reducing the city's ecological footprint. It will be of interest to ecologists, environmental scientists and managers, town planners, economists, policymakers and the general public.

The Death of American Virtue Dec 17 2021 Ten years after one of the most polarizing political scandals in American history, author Ken Gormley offers an insightful, balanced, and revealing analysis of the events leading up to the impeachment trial of President William Jefferson Clinton. From Ken Starr's initial Whitewater investigation through the Paula Jones sexual harassment suit, to the Monica Lewinsky affair and Brett Kavanaugh's role in the subsequent inquiry, The Death of American Virtue is a gripping chronicle of an ever-escalating

political feeding frenzy. In exclusive interviews, Bill Clinton, Ken Starr, Monica Lewinsky, Paula Jones, Susan McDougal, and many more key players offer candid reflections on that period. Drawing on never-before-released records and documents—including the Justice Department's internal investigation into Starr, new details concerning the death of Vince Foster, and evidence from lawyers on both sides—Gormley sheds new light on a dark and divisive chapter, the aftereffects of which are still being felt in today's political climate.

Christian Politics in Oceania Sep 02 2020 The phrase "Christian politics" evokes two meanings: political relations between denominations in one direction, and the contributions of Christian churches to debates about the governing of society. The contributors to this volume address Christian politics in both senses and argue that Christianity is always and inevitably political in the Pacific Islands. Drawing on ethnographic and historical research in Papua New Guinea, Solomon Islands, Vanuatu, and Fiji, the authors argue that Christianity and politics have redefined each other in much of Oceania in ways that make the two categories inseparable at any level of analysis. The individual chapters vividly illuminate the ways in which Christian politics operate across a wide scale, from interpersonal relations to national and global interconnections.

Cultural Ergonomics Mar 28 2020 Even when products and systems are highly localized, rarely is there one design suitable for a single, mono-cultural population of users. The products and systems created and used are cultural artifacts representing shared cognitions that characterize mental models that result from interactions with physical environments. Thus, culture is embedded and impacts the extent to which products are usable, accessible, useful, and safe. Products and systems that deviate from users' mental models may have negative consequences for users, ranging from minor annoyance to more serious consequences

such as severe injury or death. Both an introduction and a primer, Cultural Ergonomics: Theory, Methods, and Applications demonstrates how cultural ergonomics can be applied in research and practitioner contexts. It covers selection of theories, descriptions of research designs, methods to analyze the results, case studies, and strategies used to draw inferences and conclusions in a vast array of areas including occupational safety, global issues, emergency management, human-computer interaction, warnings and risk communications, and product design. Human factors/ergonomics, as a discipline, is slowly integrating cultural ergonomics into efforts to explore human capabilities and limitations in the context of design and evaluation. Edited by experts and containing contributions from pioneers in this area, this book provides examples and methodologies within a human factors framework. It provides systematic methods to apply what is learned from analysis of culture to the design, development, and evaluation of products and systems.

Summary of John A. McDougall's The McDougall Program for Maximum Weight Loss Mar 20 2022 Please note: This is a companion version & not the original book. Sample Book Insights: #1 All fats are equal, and will be stored as fat if you don't use them for fuel. Olive oil is far worse for your body than sugar, as it is easily stored as fat and doesn't satisfy your hunger. #2 The McDougall Program for Maximum Weight Loss is a no-nonsense diet based on the latest scientific and medical evidence about nutrition and the hunger drive. It is a weight loss plan that does not leave you hungry or weak. You should expect to lose between six and fifteen pounds of weight per month, especially if you start out needing substantial weight loss. #3 The McDougall Program

for Maximum Weight Loss is based on the body's natural mechanisms, and it is safe and healthy. It can be followed for the rest of your life if you are willing to change your lifestyle. #4 The main causes of overweight and illness in America are a rich, fat-laden diet and a sedentary lifestyle. These two factors alone place an overwhelming burden on the human body. If you believe that you are a failure because you cannot lose weight on the American diet, you are wrong. Baptist Missionary Magazine Nov 28 2022 Volumes 7-77, 80-83 include 13th-83rd, 86th-89th annual report of the American Baptist missionary union.

Summary of Dennis McDougal's Mother's Day Sep 26 2022 Please note: This is a companion version & not the original book. Sample Book Insights: #1 The myth that motherhood is sacred and unconditional is, unfortunately, not true. Many mothers choose not to love or care for their children, and some even abandon them. #2 The most insidious of these petty villains are those who don't understand that looking the other way is a crime. They are the ones who refuse to intervene when they see a woman backhanding her baby in the supermarket or shrieking at a son or daughter for no apparent reason at all.

Summary of Christopher McDougall's Natural Born Heroes Apr 21 2022 Please note: This is a companion version & not the original book. Sample Book Insights: #1 The German commander on Crete, General Friedrich-Wilhelm Müller, had a difficult time explaining what happened to his fellow commander, General Heinrich Kreipe. Kreipe had been captured by a British raiding force and taken off the island. #2 The Butcher was suspicious that the general had been grabbed after he left the city, but his car was found only a twenty-minute drive away. Within that brief window, these mystery men executed an ambush, disarmed and subdued two prisoners, and smoked a pack of cigarettes.

Collected Works of Braj B. Kachru Apr 28 2020 Professor Braj Kachru (b. 1932) has pioneered, shaped and defined the scholarly field of world Englishes. He is the founder and co-editor of World Englishes, the associate editor of the Oxford Companion to the English Language and contributor to the Cambridge History of the English Language. Trading and Pricing Financial Derivatives Aug 01 2020 Trading and Pricing Financial Derivatives is an introduction to the world of futures, options, and swaps. Investors who are interested in deepening their knowledge of derivatives of all kinds will find this book to be an invaluable resource. The book is also useful in a very applied course on derivative trading. The authors delve into the history of options pricing; simple strategies of options trading; binomial tree valuation; Black-Scholes option valuation; option sensitivities; risk management and interest rate swaps in this immensely informative yet easy to comprehend work. Using their vast working experience in the financial markets at international investment banks and hedge funds since the late 1990s and teaching derivatives and investment courses at the Master's level, Patrick Boyle and Jesse McDougall put forth their knowledge and expertise in clearly explained concepts. This book does not presuppose advanced mathematical knowledge, though it is presented for completeness for those that may benefit from it, and is designed for a general audience, suitable for beginners through to those with intermediate knowledge of the subject.

International Law and the Use of Force Dec 25 2019 When the United Nations Charter was adopted in 1945, states established a legal 'paradigm' for regulating the recourse to armed force. In the years since then, however, significant developments have challenged the paradigm's validity, causing a 'paradigmatic shift'. *International Law and the Use of Force* traces this shift and explores its implications for contemporary international law and practice.
