This new volume of Sociology of Crime, Deviance and Law addresses issues of race and ethnicity within the law and law-related phenomena. In *The Right to Appeal in International Criminal Law* Dražan Djukić describes appeal proceedings in international criminal law and evaluates them against human rights benchmarks. While international criminal courts and tribunals mainly comply with these benchmarks, they have fallen short in certain important areas. Despite their importance to the legal process, appeal proceedings tend to receive limited attention. On the basis of benchmarks arising from international human rights law, Dražan Djukić systematically assesses the law and practice concerning appeal proceedings in international criminal law. Teri Shields, Mother and Manager of Brooke Shields, Dies at 79 Her death followed a long illness related to dementia, a spokesman for

Brooke Shields said. Teri Shields was a single mother when she began managing her 11-month-old daughter, finding her a job in an advertisement for Ivory soap. When Brooke was 10, she arranged for a photographer to take nude pictures of her. Then came "Pretty Baby," a Calvin Klein jeans campaign when she was 15 and more movies. Ms. Shields said later that she had been like any parent who tries to do what she thinks is best for her child — and that in this case it seemed wise to take advantage of her daughter's striking beauty. She also noted Brooke's acquiescence.

"Fortunately, Brooke was at an age where she couldn't talk back," she told the television interviewer Bill Boggs a few years after "Pretty Baby" was released in 1978. In that interview Teri Shields said that people who accused her of exploiting her child were jealous. She also spoke bluntly about her daughter's appeal.

"They see total innocence, which is totally there," she said, as Brooke sat beside her.

"And two, they have the sexy child too, they have the sexy person — that appeals to them." Mr. Boggs interrupted: "Yeah, it's the forbidden fruit." Teri Shields responded, "Yes, and yet it's all wrapped up in one, and that is really appetizing." A comprehensive source of the most authoritative statements of the International Criminal Court's appellate jurisprudence. Its clear format includes commentaries followed by excerpts of the decisions and judgments, carefully selected by lawyers based on their relevance and grouped by topic. In doing so, readers are given the tools to discern the meaning of the case law themselves, while attention is drawn to the most important developments in the jurisprudence. This text

presents an authoritative and comprehensive digest of the Appeals Chamber's jurisprudence, bringing the relevant case extracts together for the first time with clear and informative commentary.

America was formed based on a vision of democracy where supreme power is supposed to be vested in the people. In *We the Who?* author Brett H. Lewis asks if Americans are losing sight of who "we the people" are and, more importantly, who we need to be in order to regain our collective identity and ensure America's continued growth and greatness. *We the Who?*

presents a collection of essays and opinions that probe into the nuts and bolts of current issues facing America today. Lewis tackles the subjects of classism, racism, justice, politics, the military, and the economy. Through these discussions, he encourages the American populace to be alert and aware to ensure that government of the people, by the people, and for the people continues to be at the forefront

of today's America. Drawing from history, logic, social inclinations, religious beliefs, and personal experiences, *We the Who?* seeks to inform the public and to encourage them to ask questions, express opinions, and hold elected leaders accountable. It communicates the necessity to be informed in order to make quality decisions about our lives. The full texts of Armed Services and other Boards of Contract Appeals decisions on contracts appeals.

Manufacturing Guilt, 2nd edition, updates the cases presented in the first edition and includes two new chapters: one concerning the case of James Driskell and another regarding Dr. Charles Smith, whose role in forensic pathology evidence led to several wrongful convictions. In this new edition, the authors demonstrate that the same factors at play in the criminalization of the powerless and marginalized are found in cases of wrongful conviction. Contrary to popular belief, wrongful convictions are

not due simply to “unintended errors,” but rather are too often the result of the deliberate actions of those working in the criminal justice system. Using Canadian cases of miscarriages of justice, the authors argue that understanding wrongful convictions and how to prevent them is incomplete outside the broader societal context in which they occur, particularly regarding racial and social inequality. Effective since China's resumption of sovereignty on 1 July 1997, the Hong Kong Basic Law lays down the general policies and system of government for Hong Kong under the “one country, two systems” formula. It guarantees Hong Kong a high degree of autonomy, enshrines the rights and freedoms of residents, and preserves a separate common law system with an independent judiciary. This introduction traces the origins of the Hong Kong Basic Law and the concepts and legal issues that surround it. Drawing on the experience of the first 15 years, it then

analyses the content of the Hong Kong Basic Law, especially in relation to Hong Kong's political system, the judiciary, and human rights. Intended especially for students at all levels in law, politics, and other disciplines, this book—the only introductory guide of its kind to the subject—will also appeal to the general reader interested in Hong Kong's experience under “one country, two systems”. “Danny Gittings's Introduction to the Hong Kong Basic Law makes a significant contribution to an important subject. It is expressed in reader-friendly terms. The insights that it provides are of value not only to lawyers but also to the general public.” —The Hon. Mr. Justice Kemal Bokhary, Permanent Judge of the Hong Kong Court of Final Appeal (1997-2012), Non-Permanent Judge (2012-). “This well-researched and very readable introduction explains the history, practices and future of the Basic Law—Hong Kong's key constitutional document. It also explores how

far the Basic Law is able to address the many political and legal issues now facing Hong Kong. The book is suitable for a wide range of readers.

Students of Hong Kong law at all levels will find it essential reading. General readers with an interest in Hong Kong's governance will find in it a lucid and accurate guide—and a timely one as the debate about implementing democracy intensifies." —Professor Fu Hualing, Faculty of Law, University of Hong Kong.

"Many of us approach law books with trepidation. But Gittings, a legal academic, used to be a journalist and this shows in his ability to make the book accessible to the general reader. [...] The Basic Law will continue to be central to issues facing the city for years to come. This book enables the reader to quickly acquire a much better understanding of them." — South China Morning Post "As Professor Gittings points out in his book, which includes a chapter on what might happen after Hong Kong's 50-year autonomy ends,

readability was a key aim.

Acronyms are kept to a minimum and details set up neatly and comprehensively in footnotes so that the main text is kept as clean as possible." — Hong Kong Lawyer To lose one child is terrible; to lose two is unimaginable. For no one to believe that you are innocent of their deaths and to be imprisoned because of it must be unbearable. Yet this is the reality Saliy Clark had to face. The daughter of a policeman, wife of a solicitor and also one herself, she suddenly found the system that she'd upheld all her life turning against her. Justice suddenly seemed a far-off principle as she was convicted and her initial appeal quashed. Her family, lawyers and various volunteers were relentless in their fight to clear her name. Following three long years in prison, Sally Clark was finally acquitted by the Court of Appeal in 2003. As Lord Justice Judge said 'Unless we are sure of guilt, the dreadful possibility always remains that a mother, already brutally scarred by the unexplained

deaths of her babies, may find herself in prison for life for killing them when she should not be there at all.' Written with the power of a thriller, the book reveals the Kafka-esque nightmare of being on the wrong side of the law. But ultimately, it's an uplifting story of one family's gutsy fight for what they know to be right. Relevant to, and drawing from, a range of disciplines, the chapters in this collection show the diversity, and applicability, of research in Bayesian argumentation. Together, they form a challenge to philosophers versed in both the use and criticism of Bayesian models who have largely overlooked their potential in argumentation. Selected from contributions to a multidisciplinary workshop on the topic held in Sweden in 2010, the authors count linguists and social psychologists among their number, in addition to philosophers. They analyze material that includes real-life court cases, experimental research results, and the

insights gained from computer models. The volume provides, for the first time, a formal measure of subjective argument strength and argument force, robust enough to allow advocates of opposing sides of an argument to agree on the relative strengths of their supporting reasoning. With papers from leading figures such as Michael Oaksford and Ulrike Hahn, the book comprises recent research conducted at the frontiers of Bayesian argumentation and provides a multitude of examples in which these formal tools can be applied to informal argument. It signals new and impending developments in philosophy, which has seen Bayesian models deployed in formal epistemology and philosophy of science, but has yet to explore the full potential of Bayesian models as a framework in argumentation. In doing so, this revealing anthology looks destined to become a standard teaching text in years to come. A groundbreaking exposé of how our legal system makes it

nearly impossible to overturn wrongful convictions
Thousands of innocent people are behind bars in the United States. But proving their innocence and winning their release is nearly impossible. In *Barred*, legal scholar Daniel S. Medwed argues that our justice system's stringent procedural rules are largely to blame for the ongoing punishment of the innocent. Those rules guarantee criminal defendants just one opportunity to appeal their convictions directly to a higher court. Afterward, the wrongfully convicted can pursue only a few narrow remedies. Even when there is strong evidence of a miscarriage of justice, rigid guidelines, bias, and deference toward lower courts all too often prevent exoneration. Offering clear explanations of legal procedures alongside heart-wrenching stories of their devastating impact, *Barred* exposes how the system is stacked against the innocent and makes a powerful call for change. Henry A. Giroux

challenges the contemporary politics of cynicism by addressing a number of issues including the various attacks on cultural politics, the multicultural discourses of academia, the corporate attack on higher education, and the cultural politics of the Disney empire. Excerpt from *Criminal Appeals: Under the Criminal Appeal Act of 1907; With Rules of Court and Forms In the second place, on a petition to the Home Office the prisoner's case only is before it. The result of that is that the Home Office has to discover the case against the prisoner, to test his conviction and his guilt in order to establish, if possible, his innocence. In the third place, there is no legal finality in the. Position of the Home Secretary. The consequence is that, although he might come to a clear and definite decision, he is always exposed to pressure to reconsider his decision. In the fourth place, the Home Office cannot, as a general rule, state its reasons for its decision. About the* Publisher Forgotten Books

How the law can let us down

'The presumption of innocence is the keystone of liberty. Yet it is constantly under attack and is liable to be whittled away, particularly in times of crisis. It

is for all thinking citizens to ensure that the presumption of innocence is a reality.' It is the foundation of Western legal systems that an accused person is presumed innocent until their crime is conclusively proven. Yet despite technological improvements - such as the use of DNA testing of suspects - grave miscarriages of justice still occur all too frequently. From the Dreyfus Affair to Lindy Chamberlain, from minor traffic offences to the worst sexual crimes, citizens have been wrongly accused and falsely convicted. Sometimes deliberate police malpractice has been the cause; sometimes a politically convenient willingness by governments and juries to lighten the burden of proof in order to achieve 'a result'. How can this happen, and - more importantly - why do we allow it to continue happening? With his characteristic insight and advocacy skills, Chester Porter QC argues that wrongful conviction is an issue of urgency, and that governments

must do more to protect their citizens from miscarriages of justice. Volume contains: 2 Abbotts Decisions 215 (Friery v. People) 2 Keyes Reports 424 (Friery v. People) 34 NY 584 (Bascom v. This volume brings together leading experts on the investigation, litigation and scholarly analysis of innocence cases in America, from legal, political and ethical perspectives. The contributors consider the challenges faced by the exoneration movement, causes of wrongful convictions, problems associated with investigating, proving, and defining 'innocence', and theories of reform. These issues are investigated from a multi-disciplinary perspective and with the aim of improving the American criminal justice system when it is faced with its most harrowing sight: an innocent defendant. Maybe he

expected too much out of his school administrators. Maybe he expected them to be professionals and honor the school policy and state education law. Maybe he believed them when they said that what happened in the office would stay in that office. Maybe a seventeen year old who has made a mistake should be treated like one. Or maybe that is just too much to ask for. Daniel Liu is a seventeen year old high school student who got caught in an attempt by the school to suspend him. To him it seemed like the administrators were trying whatever they could to prove him guilty and he had to do whatever he could to prove himself innocent. Roberts and Zuckerman's Criminal Evidence is the eagerly-anticipated third of edition of the market-leading text on criminal evidence, fully revised to take account of developments in legislation, case-law, policy debates, and academic commentary during the decade since the previous edition was published. With an

explicit focus on the rules and principles of criminal trial procedure, Roberts and Zuckerman's *Criminal Evidence* develops a coherent account of evidence law which is doctrinally detailed, securely grounded in a normative theoretical framework, and sensitive to the institutional and socio-legal factors shaping criminal litigation in practice. The book is designed to be accessible to the beginner, informative to the criminal court judge or legal practitioner, and thought-provoking to the advanced student and scholar: a textbook and monograph rolled into one. The book also provides an ideal disciplinary map and work of reference to introduce non-lawyers (including forensic scientists and other expert witnesses) to the foundational assumptions and technical intricacies of criminal trial procedure in England and Wales, and will be an invaluable resource for courts, lawyers and scholars in other jurisdictions seeking comparative insight and

understanding of evidentiary regulation in the common law tradition.
