Facelets Jan 24 2020 Curious about Facelets, but short on time for trying a new product? This short cut shows you how to start developing web pages quickly with Facelets, the new JavaServer Faces-based templating framework. This short cut begins with an explanation of what Facelets is, how it works, and what it will do for you. Then, it shows you how to install Facelets, and teaches you how to build Facelets templates, how to create UI components without writing a single line of Java code, how to create custom Facelets tags, how to integrate AJAX into a Facelets application, and more. Facelets unleashes the power and versatility of Faces by replacing the default JSP view handler with an xhtml template compiler. This short cut shows

how Facelets lessens development time and improves code reusability. Are you ready to build a top-notch JSF user interface with Facelets? Power up your computer and let's go.

Effective Databases for Text & Document Management

Jul 10 2021 "Focused on the latest research on text and document management, this guide addresses the information management needs of organizations by providing the most recent findings. How the need for effective databases to house information is impacting organizations worldwide and how some organizations that possess a vast amount of data are not able to use the data in an economic and efficient manner is demonstrated. A taxonomy for object-oriented databases, metrics for controlling database complexity, and a guide to accommodating hierarchies in relational databases are provided. Also covered is how to apply Java-triggers for X-Link management and how to build signatures."

Pharmaceutical Patents in Europe

Nov 26 2022 The pharmaceutical industry and patent legislation are inextricably linked. Pharmaceutical companies could not exist without some guarantee that they can recoup the cost of developing a new product. European patent law offers this opportunity, as it

allows companies to exclude competition for a specific product for a fixed time scale. In "Pharmaceutical Patents in Europe" the current legal patent situation is examined by a detailed analysis of case law from the European Patent Office (EPO), the international body created with the signing of the European Patent Convention (EPC). Aspects of European patent law not primarily regulated in the EPC, for example Supplementary Protection Certificates and infringement matters, are examined in the setting provided by EC law and domestic laws of European states. This book is written for the reader who understands the main characteristics of patent law and is looking for a practitioner's text on the European pharmaceutical patent law scene. Moreover, the author's remarks can help all readers to look at the field with fresh eyes.

The Scientific Article in the Age of Digitization Feb 05 2021 This book outlines the consequences of digitization for peer-reviewed research articles published in electronic journals. It is argued that digitization will revolutionize scientific communication. However, this study shows that this is not the case where scientific journals are concerned. Authors make little use of the possibilities offered by the digital medium; electronic peer review procedures have not replaced traditional ones, and users have not embraced new forms of interaction offered by some electronic journals.

Succession, Wills and Probate Oct 21 2019 *Succession, Wills and Probate* is an ideal textbook for those taking an undergraduate course in this surprisingly vibrant subject, and also provides a clear and comprehensive introduction for professionals. Against an account of the main social and political themes of succession law, the book gives detailed

explanations of core topics such as alternatives to wills and the making, altering and revocation of wills. It also explains personal representatives and how they should deal with a deceased person's estate and interpret and implement the will. Gifts may fail, estates may be insolvent or a person may die intestate, without a will at all. Increasingly relatives and others seek to challenge the will, for example on the grounds of the testator's capacity or under the law of family provision. This third edition is edited, updated and revised to take account of new legislation and case law across all the relevant issues, including a new final chapter dealing with the potentially contentious issues that are becoming more central to professional work in the field of succession.

Implementing Electronic Document and Record

Management Systems Dec 15 2021 The global shift toward delivering services online requires organizations to evolve from using traditional paper files and storage to more modern electronic methods. There has however been very little information on just how to navigate this change-until now. **Implementing Electronic Document and Record Management Systems** explains how to efficiently store and access electronic documents and records in a manner that allows quick and efficient access to information so an organization may meet the needs of its clients. The book addresses a host of issues related to electronic document and records management systems (EDRMS). From starting the project to systems administration, it details every aspect in relation to implementation and management processes. The text also explains managing cultural changes and business process re-engineering that organizations undergo as they

switch from paper-based records to electronic documents. It offers case studies that examine how various organizations across the globe have implemented EDRMS. While the task of creating and employing an EDRMS may seem daunting at best, **Implementing Electronic Document and Record Management Systems** is the resource that can provide you with the direction and guidance you need to make the transition as seamless as possible.
