**In the Gospel of John, Jesus' death is taken as a theme in discursive and narrative texts. Starting with John 14,29 the study works from the premise that the first farewell speech (John 13,31-14,31) with its eschatology and pneumatology, but also with its announcement of Jesus' confrontation with the Devil, is the key text and commentary for the Passion and Easter story (John 18-20). To enhance the theological understanding of Jesus' death, both text corpora are examined in detail and in their interrelationships from both a synchronic and diachronic perspective. First multi-year cumulation covers six years: 1965-70. Captures key developments in the field of sustainable hospital architecture. Broad in scope, yet precise in exposition, the Sixth Edition of this highly acclaimed ethics text has been infused with new insights and updated material. Richard Johannesen and new coauthors Kathleen Valde and Karen Whedbee provide a thorough, comprehensive overview of philosophical perspectives and communication contexts, pinpointing and explicating ethical issues unique to human communication.**

**Chief among the authors objectives are to: provide classic and contemporary perspectives for making ethical judgments about human communication; sensitize communication participants to essential ethical issues in the human communication process; illuminate complexities and challenges involved in making evaluations of communication ethics; and offer ideas for becoming more discerning evaluators of others communication. Provocative questions and illustrative case studies stimulate reflexive thinking and aid readers in developing their own approach to communication ethics. A comprehensive list of resources spotlights books, scholarly articles, videos, and Web sites useful for further research or personal exploration.**

**Innovations in Transportable Healthcare Architecture is the first book to examine the ways that healthcare architecture can provide better assistance in disaster-stricken communities. Aimed at architects and other professionals working across the disaster relief sector, it provides: An overview of the need for rapid response healthcare facilities; Global case studies which demonstrate real examples; Historical perspectives on redeploys used in past military and civilian contexts; Analysis of the advantages, challenges, and opportunities associated with offsite, premanufactured healthcare facilities and their component systems, for permanent installations or reuse on multiple sites; Planning and design considerations for transportable offsite-built healthcare architecture; State-of-the-art research on pop-up clinics, truck-based configurations, ISO container-based outpatient clinical and trauma care centres, and modularized facilities for contemporary military and civilian contexts.**

**Innovations in Transportable Healthcare Architecture will be an invaluable reference source for architects, disaster mitigation planners, design and engineering practitioners, non-governmental medical aid organizations (NGOs),**

**governmental health ministries, and policy specialists across the spectrum of disciplines engaged in disaster mitigation and the provision of healthcare in medically underserved communities globally. Decisions and Orders of the National Labor Relations Board, Volume 363 Includes "Sitzungen der Berliner Gesellschaft für das Studium der neuen Sprachen," 1858- Designing Public Spaces in Hospitals illustrates that in addition to their aesthetic function, public spaces in hospitals play a fundamental role concerning people's satisfaction and experience of health care. The book highlights how spatial properties, such as accessibility, visibility, proximity, and intelligibility affect people's behavior and interactions in hospital public spaces. Based on the authors' research, the book includes detailed analysis of three hospitals and criteria that can support the design in circulation areas, arrival and entrance, first point of welcome, reception, and the interface between city and hospital. Illustrated with 150 black and white images. Instead of building new hospitals that import old systems and problems, the time has come to reexamine many of our ideas about what a hospital should be. Can a building foster continuous improvement? How can we design it to be flexible and useful well into the future? How can we do more with less?
